The diagram illustrates a large cylindrical water storage tank with a capacity of 670m³. The tank's diameter is indicated as 14.6. The internal components and piping are detailed as follows:

- Armoire électrique**: An electrical cabinet is located at the bottom center of the tank.
- Cuvon**: A small square component is positioned below the electrical cabinet.
- Ballon anti-bélier**: A surge tank is located on the left side of the piping system.
- Pompe**: A pump is situated in the center of the piping system.
- Stabilisateur de pression**: A pressure stabilizer is located on the right side of the piping system.
- Vanne**: A valve is located at the bottom right of the piping system.
- Débitmètre**: A flow meter is located on the left side of the piping system.
- Cuvon Vanne altimétrique**: A small square component is located on the right side of the piping system.

The piping system is color-coded and labeled with dimensions:

- Blue lines**: Labeled *Inox Ø150*. Dimensions include 1.89, 3.21, 3.83, and 3.48.
- Green line**: Labeled *Inox Ø100*. Dimensions include 1.89, 3.21, 3.83, and 3.48.
- Red lines**: Labeled *By-pass Ø100*. Dimensions include 1.89, 3.21, 3.83, and 3.48.

The diagram also shows a cross-section of the ground level (**Sol**) and a small inset showing the tank's connection to the ground.
