

Somniosus bauchotae sp. nov. (Selachii, Squalidae, Scymnorhininae) espece nouvelle de l'Atlantique N.O.

The author describes a new sp of squaloid shark of the gen *Somniosus* Lesueur, 1818 from the waters of the Bay of Biscay. The new sp *S. bauchotae* differs from *S. microcephalus* (Schneider, 1801), *S. rostratus* (Risso, 1826) and *S. pacificus* (Bigelow and Schroeder, 1944) by the shape of the 1st dorsal and of the pectorals, by the caudal peduncle with a distinct lateral ridge, by the much larger interspace between the tip of 2nd dorsal and caudal, and also the shape of dermal denticles.
