

— Transboundary Flood Risk Management: Experiences from the UNECE Region —

This publication is based on the discussion and findings of the Workshop on Transboundary Flood Risk Management organized under the Water Convention in April 2009 in cooperation with the Governments of Germany and the Netherlands as well as WMO. It builds on the practical experience from 10 river basins in the UNECE region. The examples are offered here not as good practices, but rather as an analysis of concrete situations, problems encountered and progress made, as well as of remaining challenges and possible solutions.
