

— Capacity for Water Cooperation in Eastern Europe, Caucasus and Central Asia —

This publication analyses structures and activities of joint bodies and presents recommendations for developing cooperation and establishing and improving joint bodies in EECCA countries. It focuses particularly on aspects where existing joint bodies in EECCA countries could improve their activities by strengthening institutional mechanisms. It describes major challenges and perspectives for cooperation in specific river basins. This publication is important for those initiating joint efforts between riparian States as well as representatives of existing joint bodies. It also aims to provide information and food for thought to international organizations, decision makers and policymakers, non-governmental organizations and other stakeholders.
